

UT32MH70

32" Ultra Thin flatscreen LCD
with IPS Alpha panel technology

ULTRA THIN FLATSCREEN SERIES

Fits in beautifully

- 80 cm visible LCD flatscreen panel
- IPS Alpha panel technology
- High resolution of 1366 x 768 pixels
- PICTURE MASTER FHD Engine
- Ultra Thin just 35mms (excluding bezel)

- 1 x HDMI socket
- Dynamic contrast 10000:1
- 10.9Kg light weight design
- PC Input

360° styling

When conceiving the UT series we looked at the project from every angle to ensure that the aesthetics would be equally as pleasing – from wherever it was viewed. Concealed cables, moulded edges and subtly designed venting ensure that it will be admired whether positioned in a corner or taking centre stage in the living area.

Light weight

Every individual component within this unique set has been cleverly streamlined and miniaturised to produce the smallest and most efficient version that could be achieved. The result is a model that is as easy to hang as a picture, and at a mere 10.9Kg offers enormous flexibility for innovative placement.

KEY BENEFITS

Ultra Thin design

The UT32MH70 has been re-engineered from the inside out using pioneering techniques to produce a super-slim flatscreen with a profile of just 35mm excluding bezel – a third of the depth of conventional LCDs. This radical design enables users to position the screens wherever and however they like without compromising the viewing performance.
